

Felipe Porfirio de Lima

Senior Data Engineer

São Paulo, Brazil | +55 13 99691-0606 | [linkedin.com/in/felipe-porfirio-lima/](https://www.linkedin.com/in/felipe-porfirio-lima/)

PROFESSIONAL SUMMARY

Senior Data Engineer with 10+ years of experience building and optimizing enterprise data platforms, Data Warehouses, and ETL/ELT pipelines. Strong background in SQL Server, PostgreSQL, Python, ETL development, and BI solutions, with hands-on experience in performance optimization, incremental data processing, and data integration architectures. Experienced in designing scalable data workflows, optimizing data platforms, and supporting enterprise analytics environments across Financial Services, Telecommunications, Retail, and pharmaceutical industries.

TECHNICAL SKILLS

Data Engineering

- ETL/ELT, Data Pipelines, Data Warehousing, Data Modeling
- Databricks, PySpark, SparkSQL, Delta Lake (Training / Hands-on Projects)

Databases

- Microsoft SQL Server, PostgreSQL, Oracle, MySQL

Programming

- Python, T-SQL

Cloud & Analytics

- Azure Data Factory, Power BI

Data Architecture

- Dimensional Modeling, Star Schema, Medallion Architecture (Bronze/Silver/Gold), Change Tracking, Performance Optimization, SSIS, SSAS

Selected Achievements

- Reduced ETL processing time by 75% (from 8 minutes to 2 minutes) by implementing SQL Server Change Tracking-based incremental loading strategies.
- Reduced stored procedure execution time by approximately 56% (from 3 hours to 1 hour and 20 minutes) through query optimization, business logic improvements, and indexing strategies.
- Designed and optimized data integration processes between SQL Server operational systems and PostgreSQL analytical environments.

CERTIFICATIONS

- Microsoft Certified Solutions Associate (MCSA) - SQL Server 2016 Database Development

EXPERIENCE

Senior Database Developer / Data Engineer | Global System - Nov 2024 / Current

- Designed and optimized Data Warehouse processes supporting enterprise BI and analytics solutions.
- Implemented Change Tracking-based incremental loading strategies, reducing unnecessary data processing and improving ETL efficiency.
- Optimized complex SQL Server workloads through query tuning, indexing strategies, and execution plan analysis.
- Developed ETL pipelines integrating operational systems into analytical environments.
- Supported Power BI datasets, reporting environments, and enterprise analytics solutions.

Data Analyst (Data Engineering Focus) | Banco BMG - Dec 2022 / Nov 2024

- Participated in Data Warehouse modeling and data integration projects.
- Developed SQL Server and Python-based data processing solutions to support analytical and reporting environments.

Mid-Level SQL Developer | Global System - Dec 2020 / Dec 2022

- Developed ETL processes and enterprise database solutions for large-scale business operations.
- Performed database performance tuning and troubleshooting.

Mid-Level SQL Developer | Pense Farma - Oct 2018 / Dec 2020

- Developed T-SQL routines supporting operational critical healthcare and retail business applications.

Junior SQL Developer | Procfite - July 2016 / Oct 2018

- Developed database solutions and ETL processes for ERP systems.

EDUCATION

Bachelor's degree in information systems

Coursework included:

- Database Systems
- Software Engineering
- Information Technology Management

LANGUAGE

- Portuguese: Native
- English: Professional Working Proficiency (B1)
